Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Non-Final Rejection

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claims 1-9, as best understood, are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, "a plurality of structural components that are secured together in such a manner as to form a space frame assembly" fails to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, "a plurality of body closure panels mounted on said structural components of said vehicle frame assembly to form the vehicular body and frame assembly" fails to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 2, "a generally flat panel having one or more open spaces provided therein to support other components of vehicular body and frame assembly thereon" fails to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It appears that page 9, line 19, "gaskets 24" should be "gaskets 34".

It appears that claim 1, line 4, "said vehicle frame assembly" lacks antecedent basis.

2. Claims, elected for prosecution, are confusing and are not clear because claimed limitations, (claim 1, a plurality of structural components that are secured together in such a manner as to form a space frame assembly; claim 1, a plurality of body closure panels mounted on said structural components of said vehicle frame assembly to form the vehicular body and frame assembly; claim 2, "a generally flat panel having one or more open spaces provided therein to support other components of vehicular body and frame assembly thereon), are not shown in the figures and/or lacks support in the specification and therefore fails to particularly point out and distinctly claim the subject matter which applicant regards as the invention. These limitations must be shown or the feature(s) canceled from the

claim(s). Applicant is requested to go through the application and ensure that the claimed matter has been described in the specification and shown in the drawing in such a way as to convey to one skilled in the art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Ashina et al. (6,022,070).

Regarding claims 1-9, as best understood, Ashina et al. (6,022,070) discloses in Fig. 1-16 the invention as claimed to include a plurality of structural components 162, 164 that are secured together in such a manner as to form a space frame assembly 101 and a plurality of body closure panels 102a-102g mounted on said

structural components of said vehicle frame assembly to form the vehicular body and frame assembly; a generally flat panel having one or more open spaces Fig 1 provided therein to support other components of vehicular body and frame assembly thereon; a door closure panel 102b; a front windshield closure panel 102a; a rear windshield closure panel 102e; a floor closure panel; panels having sized and shaped recess Fig 1; first and second sealing devices Fig 13B.

Conclusion

4. The prior art made of record in attached Notice of Reference Cited (PTO-892) and not relied upon is considered pertinent to applicant's disclosure. This art of record shows various features similar to the applicant's invention.
